The Sun Star

To the editor:

I would like to publicly acknowledge Kemper House in Strongsville.

Kemper House Residential Care Facility for people with memory impairment lives up to its mission statement "To create a life for residents, families, and employees, which affirms the innate dignity of persons, fosters the innovative expression of compassion, and pursues the infinite worth of each moment."

My father spent the last nine months of his life at Kemper House and the staff fulfilled their mission with kind, professional care. They are truly special people and I thank them.

Chris Helman
